

The School District of North Fond du Lac
“Working Together for the Success of All.”

The School District of North Fond du Lac is comprised of the Early Learning Center (which currently houses a privately owned childcare facility), Head Start, early childhood, four and five-year-old kindergarten programs; the Friendship Learning Center (grades 1st - 5th), Bessie Allen Middle School (grades 6th - 8th) Horace Mann High School (grades 9th - 12th), as well as an Alternative Learning Center for high school students. Because of a recent referendum, the District is building a 94,000 square foot addition to Friendship Learning Center which will then house the District's early childhood through 5th grades. Also, the District is planning and starting the Treffert Way for the Exceptional Mind charter school (in cooperation with Agnesian SSM) that will open in the Fall of 2019.

Located in the Fox Valley, families enjoy the convenience of small town living with big time education opportunities for all children.

Dedicated to attracting and retaining a world-class staff to serve all our children, no matter where each is on his or her learning journey, the highly qualified and talented educators serve 1450+ students. The District dedicates its resources to provide small class sizes, state-of-the-art technology support (school provided 1-1 computer technology grades 5K - 12th) and many opportunities to become involved in school activities and athletics. Outstanding programs, such as vocal and instrumental music, art, business education and technical education, serve to enhance a strong core of academic courses in the pre-K - 12th grade curriculum.

The School District of North Fond du Lac, in cooperation with the community, is committed to providing an outstanding educational program in a safe and nurturing environment built upon mutual trust and respect, and designed so all individuals become lifelong learners.
